MARU DINING TABLE

Round Solid Oak Dining Table

Round Solid Oak Dining Table

A round table changes the politics of a room. No head, no foot, no hierarchy — just a circle where people sit as equals. The Maru turns this geometry into a solid oak dining table for shared meals and equal conversation.

Design benefits

- 1300 mm diameter seats 4–6 comfortably; no head of table, no corners.
- 730 mm dining height pairs with the Yume Chair and Ishi Stool.
- Continuous computed edge appears visually thin while remaining soft to the hand.
- Solid oak base distributes weight evenly; top flex stays under 1 mm in normal use.
