YUME CHAIR

Dining Lounge Chair

The Yume Chair is a dining lounge chair built for long seating. At 640 mm wide and with a 10° backrest angle, it provides comfort through proportion and geometry rather than mechanism. A solid North American oak frame holds the upholstered seat and back as precise material inserts.

Design benefits

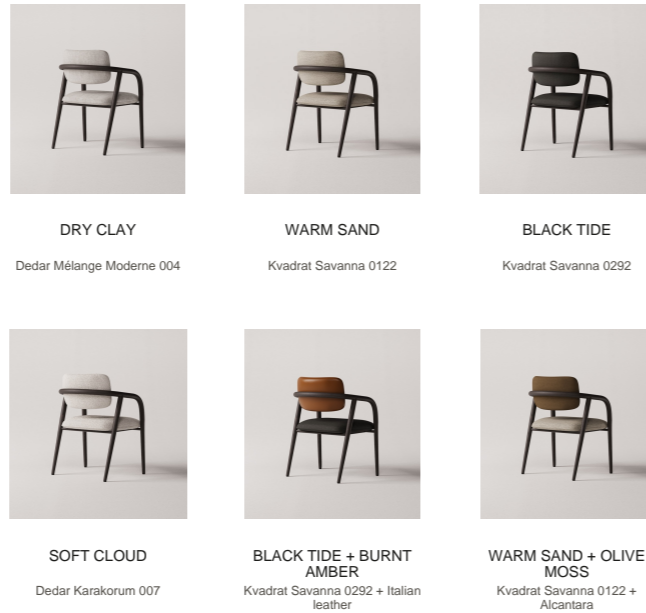

- 640 mm width gives generous dining-lounge proportion.
- 10° backrest angle supports long seating without mechanism.
- Oak frame, seat, and back read cleanly from every side.

In context

PRODUCT OPTIONS

Upholstery options

DRY CLAY

Dedar Mélange Moderne 004

WARM SAND

Kvadrat Savanna 0122

BLACK TIDE

Kvadrat Savanna 0292
