

ABOUT

Mililab is a Tokyo-based architecture studio and furniture maker, founded in 2020 by Livert Lim and Miku Wu. The studio designs buildings, interiors, and the ENWA furniture collection — a line of computational furniture where every curve is found by algorithm and finished by hand. The ENWA collection's signature detail — the edge paradox, a concave curve that looks sharp from across the room but feels soft under the hand — was computed using Grasshopper, the parametric modelling software standard in architecture. The studio has completed projects spanning luxury residences, hospitality, and cultural institutions across five countries.

KEY FACTS

Founded	2020, Tokyo	Founders	Livert Lim, Miku Wu
Studio	Shibuya, Tokyo	Team	5 — architects, designers, computational
Disciplines	Architecture, Interior, Furniture	Collection	ENWA — 8 pieces
Price range	\$1,200 – \$12,800	Materials	Japanese & European oak, Kvadrat, Dedar
Lead time	10–14 weeks	Shipping	Worldwide, white-glove delivery

ENWA COLLECTION

Ishi Stool Stool From \$1,200	Yume Chair Dining Chair From \$2,200	Kawa Bench Sofa Bench From \$4,200	Sora Sofa Modular Sofa By consultation
Tsuki Coffee Table Round Coffee Table From \$2,800	Shizu Low Table Low Coffee Table From \$3,200	Maru Dining Round Dining Table From \$5,800	Sen Dining Table Rectangular Dining From \$6,800

BOILERPLATE

Mililab is a Tokyo architecture studio and furniture maker founded in 2020. The studio's ENWA collection applies building-scale parametric algorithms to furniture craft — every curve computed by Grasshopper, every surface finished by hand. With completed projects spanning five countries, the collection ships worldwide direct from Tokyo. mililab.co
