

MILILAB

Architecture · Furniture · Tokyo

ABOUT

Mililab is a Tokyo-led architecture and design studio working across interiors, furniture, and digital systems. Its ENWA Collection is a made-to-order line of architect-designed solid oak furniture shaped around touch, proportion, and the feeling of a room.

ENWA pieces look precise from a distance but soften at the hand: continuous edges, resolved backs, and forms developed as spatial objects rather than catalogue furniture. The collection is made in solid North American oak, with Kvadrat upholstery as standard and Dedar options for premium specifications.

EDITORIAL BOILERPLATE

Mililab is a Tokyo-led architecture and design studio creating ENWA, a collection of architect-designed solid oak furniture shaped around touch, proportion, and the feeling of a room. The studio works across interiors, furniture, and digital systems, bringing architectural discipline to objects for residential, hospitality, and design-led commercial interiors.
